

Biosolids Stakeholder Meeting Agenda for Proposed Rulemaking for 30 TAC Chapter 312

October 30, 2017

I. Welcome and Introductions

II. Purpose of Proposed Rulemaking:

- Clarify the existing prohibition on the land application of any mixture of domestic sewage sludge with grit trap or grease trap waste
- Clarify requirements to maintain buffer zones
- Clarify the applicability of an individual permit requirement for a processing facility
- Update metal concentration limits consistent with 40 Code of Federal Regulations Part 503
- Clarify the applicability of storage and staging requirements to domestic septage and water treatment plant residuals
- Add requirements for the land application of water treatment plant residuals consistent with longstanding TCEQ practice
- Clarify the notification requirement for landowners within ¼ mile of a Class B land application unit

Additional Administrative changes:

- Include the use of the term “biosolids” as it pertains to beneficial land application of treated domestic sewage sludge (Class A, Class AB and Class B)
- Rename Water Treatment Plant Sludge as Water Treatment Plant Residuals
- Revise existing definitions as needed based on Stakeholder input

III. Additional Questions and Input from Stakeholders

IV. Rule Process and Upcoming Milestones

V. Adjourn

Biosolids Stakeholder Meeting Attendance Agenda Room 201S October 30, 2017

First Name	Last Name	Company
Chris	Pasch	Alan Plummer Associates, Inc.
